

Steamer was slightly damaged in its fight with the storm, but barring sea-sickness, the passengers were all landed safely. The steamer's smokestack was bent by the dashing of the waves and some of the minor superstructure damaged, but none of it is of a serious nature.

Blown from Position.
SAVANNAH, GA., December 27.—The Ward Line steamship Havana, New York to Havana, reported by wireless to-day that during the severe storm of Christmas Day, the Diamond Shield lightship was blown out of position and has not been replaced. According to the Havana, the wind reached a velocity of ninety miles an hour, and the barometer fell to 28.00. All coast shipping due at Savannah is greatly delayed.

Iroquois Disabled.
NORFOLK, VA., December 27.—A wireless message received here late to-day says that the Clyde Line steamer Iroquois, Captain Ingram, from Charleston, S. C., for New York, is at anchor off Erying Pan Shoals, N. C., with a badly disabled rudder. The Iroquois left Jacksonville on December 20, touching at Charleston.

Answers 'S. O. S.' Call.
TAMPA, FLA., December 27.—A wireless message to-night from the steamer Iroquois bore the information that the Mallory liner San Marcos answered the "S. O. S." call of the crippled ship and went to her assistance. A line was thrown to the Iroquois and the San Marcos started towing her, but the sea was so heavy that the hawser parted at 8:30 P. M., and it was decided to anchor until morning. The Clyde liner Mohawk later joined the vessels, and is now lying by until morning, when a towline will be flung again and the vessel taken to New York.

No Immediate Danger.
WILMINGTON, N. C., December 27.—The tug Alexander Jones and Sea King left Southampton this afternoon to aid the Clyde steamer Iroquois off Erying Pan Shoals, and expect to reach the disabled vessel about 8:30 o'clock to-morrow morning. There is a rough sea, but at least accounts the Iroquois was in no immediate danger.

Vessel Is Lost.
BOSTON, MASS., December 27.—From the amount of wrecking on Hull Beach, a portion of which has been identified, there is every reason to believe that the five-masted Boston schooner Davis Palmer was lost off the point in the harbor during yesterday's storm with all on board, twelve men. The wrecking included the quarter board with the vessel's name, the top of the deckhouse and skylight, considerable furniture and other inside cabin fittings.

The Davis Palmer. In command of Captain Leroy K. McKewen, of Malden, left New York Nov. 22, with 4,000 tons of coal, for Boston. From the point at which the wrecking was sighted, the fact that none was found on Nantasket Beach, it was the opinion of the life-savers at Hull that if the Palmer was lost, it was either by collision or striking one of the outlying ledges at some point northeast of the entrance of the harbor.

Eastern Shore Stormbound.
NORFOLK, VA., December 27.—With traffic completely tied up on the Eastern Shore of Virginia and Maryland as the result of the winter's worst storm, mail has reached Norfolk only at noon to-day, and Norfolk and East since Saturday night, with the exception of one small pouch, which came in through Washington during last night. The snow precipitated along the lines of the New York, Philadelphia and Norfolk Railroad is reported as upwards of thirty inches. Winds ranging from forty to fifty miles an hour during yesterday so drifted the snow as to block all trains north and south. Passengers who left Norfolk last night by steamer are still stormbound at Cape Charles. All telegraphic communication is cut off north of Cape Charles.

ADMIRAL'S VISIT WAS UNOFFICIAL

(Continued From Page One—Column 1.)
One else in his position would have acted other than as I did. Neither of these men had any property in Nicaragua, American and other foreign holding property in Nicaragua. They were native-born citizens, and they had the advantage of not having to pay direct taxes.

I think that Secretary Knox took harsh action against me. I believe his object was that I resign. That I have done. I am now only a private citizen, and such I shall remain.

"It is my intention not to enter politics again. The report that I had taken command of the United States forces was absolutely false. I have not and never intended to do so."

Zelaya attributed much of his woe to Harry Caldera, the American vice-consul at Managua, whom he said:

"The United States government has grossly misinformed through this man about conditions in my country. The vice-consul is a member of the Conservative party, and an ardent defender of that party's views."

Made False Report.
"With the object of overthrowing my government, he made false reports to Washington, which I firmly believe had much to do with the note of Secretary Knox. I have no doubt that those reports led him to adopt the attitude he did towards me."

During the afternoon Zelaya was called upon by several Mexican officials here, among whom was Juan Broslings, collector of the port, who welcomed the former President with the words:

"I receive you like a brother."

Zelaya said he had had a good voyage, but that he was feeling badly and had a slight fever. He did not appear ill at ease or excited, and during the afternoon sat for a photograph on the deck.

He left Managua accompanied by Minister Carbajal, of Mexico, who escorted him aboard the Guerrero at Corinto.

"It was at perfect liberty at all times and was not intercepted," he said. "I boarded the Guerrero in broad daylight on the afternoon of the 24th. The English minister at Managua offered me conveyance upon the sloop Shearwater, then at anchor at Corinto, to any country I wanted to go, but I preferred to come to Mexico."

Scott at the Story.
WASHINGTON, D. C., December 27.—While the State Department declined to discuss the report that Mexico had itself prevented the return of former President Zelaya to Nicaragua, the Central American diplomats here scoffed at the story. It was pointed out that Zelaya is not a political refugee; that he was not intercepted when

TO CURE A COLD IN ONE DAY.
Take LAXATIVE. Cures Cough, Croup, Hoarseness, Sore Throat, Whooping Cough, Bronchitis, Asthma, Hay Fever, Eczema, Scabies, Ringworm, etc. Price 10c. Sold everywhere.

THE INNER-PLAYER PIANO

Will brighten the home as no other instrument can.

It's easy to know why and how when we tell you that everybody can play an Inner-Player Piano.

Our warerooms is the only place in Richmond where the genuine Inner-Player Piano is sold.

he left the country over which he formerly held sway, and that being now a private citizen, Mexico can have no jurisdiction over him.

"Zelaya is free as any man," said a diplomat to-night.

The report that Rear-Admiral Kimball visited President Madrid at Managua caused no surprise. No explanation was vouchsafed by the Navy Department, but the officer's visit was pursuant to naval usage, which provides that the commander of a naval force shall call formally on the head of the de facto government in the waters of which his ships lie.

The docking of the General Guerrero, the Mexican gunboat, at Salina Cruz, with former President Zelaya and party on board, is not regarded as a change in the former President's plans. As understood here, it was his purpose at the time he left Managua to proceed to the City of Mexico, and there no doubt that will be his destination. How long he will remain in Mexico, however, is not known here.

Zelaya is not regarded in official circles here as at all conclusive that he will escape punishment for his crimes in his country. The United States government has never taken any steps whatever for the apprehension of Zelaya or to prevent his leaving the country, but it is generally expected that liberation, knowing that should his presence in Nicaragua be required at any future time to answer for his misdeeds, he would not be secured with little or no difficulty.

NOT WILLING NOW TO TAKE WIFE BACK

(Continued From Page One—Column 2.)
which I have learned since Friday," said the witness.

"But haven't you changed your mind a good many times?"

The witness declared that his present decision was final. Brokaw scrutinized telegrams which have figured conspicuously in the trial. He said that his many telegraphic queries concerning his wife's doings were prompted only by solicitude for her health and not by suspicion.

Asked if he had ever employed a detective to shadow Mrs. Brokaw, he replied:

"I never did. I haven't paid any bills for detective work since before my marriage."

Counsel for Mrs. Brokaw inquired why certain persons had not been subpoenaed as witnesses for the defense, especially Brokaw's private secretary, Byford, for a long time Brokaw's confidential man.

Brokaw replied that Byford had only returned from Europe last Friday.

"Did you ever know of Mr. Byford sending telegrams to butlers and servants inquiring about Mrs. Brokaw's movements without your knowledge, or any secretary who did?" asked Mr. Baldwin.

"Oh, he may have wired to ask about what was going on in the house," answered the witness.

"Then we are to understand that your secretary inquired of the servants, and in that way found out about Mrs. Brokaw's movements?"

"Well, it was not done with the purpose of spying on Mrs. Brokaw. It was to find out what was going on in the house."

"He wanted to inquire about Mrs. Brokaw's health?"

"Yes."

"He was very fond of Mrs. Brokaw?"

"Yes, I think he was."

DO-NOTHING PLAN HAS BEEN FRAMED

(Continued From Page One—Column 3.)
audible, because of the acclaim that has greeted the Speaker's protestations of fealty to the administration.

Cannon's Motive Not Unsettled.

It has been clearly understood all the time, of course, that the motive behind the Speaker's declarations of loyalty to President Taft—for this session—has been a keen realization of his own critical political situation. It is not that the Republican insurgents in the House are likely to overthrow him on any concrete proposition during the session, but they are likely to hammer away at him all the time in such fashion as to keep political action focused upon Taft as an undesirable citizen, thus endangering the election of a Republican House next year, and rendering it practically certain that Mr. Cannon cannot succeed himself in the speakership even if the Republicans do carry the House.

This fact being so patent has given to close observers here of the congressional situation a perhaps keener appreciation of the sinister tendency of the hints that have come from the Speaker's friends that has been had elsewhere. It has prepared them to appreciate equally the peculiar signs that have been coming from the Senate wing of the Capitol. There has been no pronouncement of fealty from the Senate leaders. The softest word uttered here would be accurately described as tumultuous compared to the softness that has marked their deliberations thus far. Taft's position is not so far from being desirable as it once was. But every sign in the House and Senate points to the fact that the Speaker's friends have given to close observers here of the congressional situation a perhaps keener appreciation of the sinister tendency of the hints that have come from the Speaker's friends that has been had elsewhere.

How Aldrich Is Quietly Working.

Neither trumpet nor drum has heralded his goings out and comings in. No fanfare has marked his journeys among the Senators, and no speeches on the floor have announced his intentions. It has all been quiet, very quiet, in the soft, effective way of which he is so fond. But every sign when the Senate has met, Senator Aldrich has found occasion to drop down beside some one of his colleagues for

Sun rises	7:15
Moon sets	4:57
Sun sets	5:45
Moon rises	1:14

a little chat about the business of the session. Sometimes when a Senator has had other business that took him to the office of the chairman of the Finance Committee, a similar little conversation has taken place before he got away. It only requires a few moments at most for the general manager to lay out his scheme. His theme is always the same—prosperity and let well enough alone.

This is a first-class time, he points out in his persuasive manner, to avoid anything that will interfere with the full resumption of prosperity. Business is now getting back to where it was before disaster overtook it in the fall of 1908. The outlook for 1910 is better than anything we have had in some time. Everything now is going well. All that is needed to get back into the full tide is just to let well enough alone, do nothing that will disturb the present serene state of the business world; do not bother with legislative schemes that must necessarily affect all business affairs and create uncertainty where assurance of peace and quiet is essential. And so on.

All Senators Not Quiescent.

Once in a while it has happened that a Senator receiving this song of hypnotic somnolence has stirred a little uneasily and asked a question or two.

"What, no legislation at all? Just the appropriation bills and quit?" Well, hardly as far as that. Or course, the interstate commerce law must be fixed up a bit; everybody reckons on that, you know. But that won't take much time or effort. A very little amending will put that in satisfactory shape. It can be done easily by the time the money bills are ready for final action, and then Congress can adjourn and go home contentedly with a fine record for having let prosperity return unhampered, and the election of a Republican Congress next fall is assured. Hooray! Hooray!

But how about postal savings banks? The Republican plan to establish them, promised them; President Taft promised them both before and after his election, and his message declares for them. How about that?

Nothing doing. The country doesn't need postal savings banks. There are plenty of good, sound banks to care for all needs. Business is opposed to the postal savings bank idea. Agitation of that scheme will prove a disturbing element. So it had better be dropped.

Then what about conservation? Everybody is committed to it. The whole country is eager for it. That may be so. Yes, the men who know about such things are to be permitted to drop the scheme, and when it is ready the general manager will look it over very carefully before uncoiling the chloroform bottle.

An Old Game in Congress.

So it goes down the line of the party and program promises. The view of declaration of war, with different projects, but always the soft pedal is pressing.

Thus the stage for the long session of the Sixty-first Congress has been set. It is a game, old as congressional politics, yet always new. It takes for its exact play a situation like the present one, with the House compelled to respond to public clamor and the Senate in the grip of a man who is owner of a sovereign State and need not care what his people think.

It will be interesting these next few months to see the House of Representatives writhing under the whip of Speaker Cannon while it hustles to put through the bills demanded by the administration so that they can go quickly to the Senate, where the pigeonholes of the Senate committees.

Locked in the Pigeonholes.
Locked in the pigeonholes for keeps. Full many a bill lies down and sleeps. And calmly, patiently, it waits. Locked in the pigeonholes for keeps. Mr. Cannon will make good. As soon as the President sends in the special messages he has promised, making his recommendations for specific legislation, the bills carrying them out will begin to exhibit a lively interest. There will be plenty of blarney of trumpets and beating of tom-toms. The whole country will be convinced that the Speaker's Cause is standing by the administration, and putting through the desired legislation.

After that, when the bills have gone to the Senate, the Speaker will be entitled to the plaudits of approval of an admiring country? And most especially will they not be entitled to the enthusiastic re-election? "Whang! Ho. Why certainly so."

FIVE TRAINMEN KILLED

SEYMOUR, IND., December 27.—Five trainmen were killed and two were fatally hurt to-day in a head-on freight collision on the Baltimore and Ohio Southwestern Railroad near East Ellettsville. The dead are Lawrence Amick, engineer; J. L. Routt and Jacob Embry, firemen; Finley Lee and Frank Hattabaugh, brakemen. R. J. Conley, brakeman, and Frank M. Walls, engineer, were fatally hurt.

The trains met on a sharp curve, apparently because of misunderstanding of orders. Locomotives and cars were smashed, and their wreckage was piled high. The injured suffered terribly in the cold before help reached them.

MARRIED TWICE THEN ELOPE

Says the Second Mrs. Lockwood, Getting an Annulment From Her Husband.
TRENTON, N. J., December 27.—Chancellor Pitney has signed a decree of annulment for Mrs. Mathilda A. Lockwood, who was Miss Fox of this city, from her husband, Henry E. Lockwood, of Rochester, on the ground that he had a wife living when he married her. It was alleged that although he had married twice and both wives were still living, he subsequently eloped with the wife of Joseph Hill, of this city.

A further complication in the situation is that the first Mrs. Lockwood has begun suit for divorce in New York, and has called the second Mrs. Lockwood to testify in the suit here.

PRESIDENT MOPFAT DENIES THE STORY.
DENVER, COLO., December 27.—D. H. Mopfat, president of the Denver, North-Western and Pacific Railroad, and known as the "Mopfat Road," to-day denied a story published in a Denver paper to the effect that the Rock Island system had acquired control of the Mopfat road.

The report was based on an assertion that the stock of the Rock Island Tunnel project had been withdrawn. This was a \$5,000,000 corporation, the object of which was to drive a bore through James Peak, thus reducing materially the heavy grades on the east end of the Mopfat road.

"There's not a word of truth in it," said Mr. Mopfat.

What You Get
Beautiful Gifts and many of them, and you're happy. Good. But remember—that a sick liver and slow torpid bowels—make the most beautiful gifts lose their beauty—CASARETS will clean up the bowels—make the liver act—everything look better.

SUFFERING INTENSE THROUGHOUT SPAIN

Returns From Flood-Swept Provinces Indicate About 600 Dead.

MADRID, December 27.—Incomplete returns from the flood swept provinces of Spain to-day indicate a minimum dead of from 500 to 600, with the possibility that the complete story will greatly swell this number.

Freezing weather had followed the flood, and the distress in the devastated towns is acute. The government is doing everything possible to relieve the suffering, but owing to the destruction of many lines of railroad tracks, it will be days before some of the isolated places can be reached.

The provinces of Galicia, Zamora, Valladolid, Burgos, Toledo, Santander and Jugo are the worst sufferers, the property loss there running into the millions.

The banks of Douro and Guadaluquivr Rivers are strewn with corpses. One of the most serious features of the loss is the destruction of the two stock on hundreds of farms, necessitating the importation of herds and cattle and flocks of sheep to replace those that were drowned.

Dispatches from Portugal say that the damage there is almost as heavy as in Spain. King Manuel, of Portugal, is now at Oporto, the centre of the Portuguese flood area, and assumed personal charge of the relief work.

The Cabinet has voted financial aid to the stricken sections.

COL. GORDON NAMED

He Succeeds Late A. J. McLaurin as United States Senator.

JACKSON, MISS., December 27.—The appointment of Colonel James Gordon, of Okolona, as United States Senator from Mississippi to succeed the late Senator A. J. McLaurin, was announced by Governor Noel to-day.

The appointment is on the Legislature can elect a Senator for the unexpired term, and is made with the understanding that Senator Gordon will not be a candidate for this term.

The appointment was a surprise in political circles as it was generally expected that Governor Noel would leave the office vacant until the Legislature takes up the question on January 11. While Senator Gordon may not serve more than two or three weeks, there is a strong probability of a legislative deadlock, owing to the large number of probable candidates.

It is therefore not improbable that Mr. Gordon might serve a year or more. He is seventy-six years old, a native of Mississippi, and served with distinction in the Confederate Army. He has not been prominent in public life during the past twenty years.

Governor Noel announced that one of his principal motives in appointing Mr. Gordon was to give a compliment to the soldiers of the Confederacy.

CHANGES LAWYERS

Mrs. Caroline Martin Seck's New Counsel to Defend Her.
NEW YORK, December 27.—Mrs. Caroline B. Martin, mother of Mrs. O'Connell, victim of the East Orange bathhouse tragedy, changed lawyers to-day. It was announced that Colonel Robert J. Haire had withdrawn from the defense of Mrs. Martin and her sister, Mrs. Mary Seck, held here for extradition to New Jersey on indictments charging them with complicity in causing O'Connell's death.

His place was taken by Clark L. Jordan, an assistant from whose office he had a long consultation with the two elderly women to-day.

Franklin W. Fort, counsel for Miss Wardlaw, has sent an appeal to members of many prominent families in the South in the form of a circular letter asking those who receive them to help in clearing his client of the crime of which she is accused.

MINERS ARE KILLED WHILE ENTERING SHAFT

KNOXVILLE, TENN., December 27.—While being lowered at McPherson mine at Ducktown, Tenn., by means of a cable, two miners were instantly killed. They were nearly 300 feet below ground when an iron cross-head above them broke loose, and they were struck and hurled to the bottom of the shaft into a deep pool of water. The bodies were recovered.

GRAZED ON LINER; SHOOT HIMSELF

(Continued From Page One—Column 4.)
guarded, and yesterday, when the vessel reached here, he was turned over to the immigration officials. Vogelgin will probably be deported on the Touraine which leaves on Thursday.

Had Rough Trip.
The Touraine had a rough trip from Havre, and also suffered the coast in time to get the full fury of the Christmas Day storm. It was a fitting ending of a winter voyage, for storms had beset her almost all the way from Havre to New York.

While the vessel was weathering the storm on Christmas Day, Jean Le Cal Calvez, of Havre, a Frenchman, disappeared. The man had been celebrating the Yuletide, and when it came time for his watch in the stokehold he could not be found. A search of the vessel was made at once, but no trace of the man could be found. No one knew where he had gone. He was grazed by the heat of the stokehold, he had jumped overboard, or had fallen over the side, is not known.

On the third day out, when the vessel was in mid-Atlantic, an oil-carrying steamer was sighted.

Her engines seemed to be motionless, and she was laboring heavily in the heavy sea. Believing that the vessel was in distress, Captain Mourand ordered the Touraine to stop and render assistance. Through the storm he signaled, asking if help was needed. The reply came back that the other craft was not in trouble, and that she was waiting for the storm to lessen.

"Thanks for offer" was the final signal she displayed as the Touraine again took up her course for port.

The weather was excessively rough on the third day, and the passengers celebrated, and there was an extra good dinner for all.

"Uncle of Europe" Is Ill.
COPENHAGEN, Denmark.—Prince Hans of Schleswig-Holstein-Sonderburg-Beck, a brother of the late King Christian of Denmark, and generally known as the "Uncle of Europe," is critically ill. The prince was born in 1825.
